

## Product Portfolio

- **Brightener X** – Special Detergent for Soaping Process

Brightener X is mainly applied for soaping on denims. Can mix with Whitening agents and its easily soluble in water. The product improves color fastness while maintaining the original shade without causing yellowing, resulting in cleaner, brighter denim garments with an excellent appearance.

- **ChloroX Neut** – Specialty Oxygen & Chlorine Scavenger

A high-performance specialty product for the efficient removal of residual oxygen and chlorine following the bleaching Process. . It can work well with little dosage and remove the nasty smell. It is convenient to use, eco-friendly and harmless to humans, as well as the good cleaning effect to the bad smells.

Its highly effective low-dosage formulation neutralizes unpleasant odors, improves the aesthetic appeal of the final product, and contributes to superior overall finish quality.

- **Nozon** – An anti-Ozone softener for Indigo dyed garments

Along with imparting a smooth, pleasant, and bulky hand feel, the product protects loosely bound indigo dye on denim from photodegradation caused by sunlight exposure.

This helps minimize fold marks, yellowing, and premature fading, thereby preserving the garment's original appearance and extending its visual appeal.

- **Surfex-C** – A versatile surface modifier for Garment and yarn dyeing.

It is mainly used in Garment and Yarn dyeing. It has characteristics of deep color and good fastness. High colour yield can save the amount of dyestuffs and cost of dyeing

- **Easy-B - Low Temperature Bleaching Enzyme preparation**

Easy-B is a next-generation low-temperature bleaching enzyme preparation specially developed for denim processing. Its specially formulated enzyme for grey tone. It works well with low temperature and gives a special grey tone to indigo denim. It gives results in very short period. Its environmentally friendly product and can create a new method in fashion Industry by the vintage effect

Its mild enzymatic action makes it safe for Lycra-containing fabrics, ensuring superior fabric integrity and enhanced garment quality.

- **Protect-B – A Specially Formulated Blocking Agent for Garment Processing**

Protect B selectively protect fabric surfaces from bleaching agents such as potassium permanganate and sodium hypochlorite. It enables the creation of a wide variety of fashion effects by preventing unwanted bleaching in targeted areas.

The product is suitable for both brush and spray application methods and helps maintain a soft fabric hand feel without adversely affecting the garment's appearance or performance.

- **Zycol Sul-D – A Special Discharging Agent for Sulphur Dyes**

Zycol Sul-D is a specially formulated discharging agent for sulphur-dyed garments. It effectively discharges sulphur dyes to create fashionable wash effects.

The product delivers uniform discharge while preserving the fabric's strength, ensuring excellent aesthetics without compromising garment durability.
